Urbanality Click | luxury vinyl plank

Features

Unlike anything done before! Here, at excellent price points, are designs and colors intentionally suited for urban spaces and multi-family housing—anywhere people enjoy forward-thinking decor. Urbanality steps into new visuals that are not entirely wood designs. That's because there's a great need in many markets—especially urban—for products without busy graining or strong character. So this collection features clean, simple-grained woods like white oak and maple—alongside striations that are wood like but don't represent a species. Urbanality's design intentionally avoids regional characteristics and works well for both west coast and east coast looks.

Urbanality Click offers lots of colors, lower gloss level, and some very progressive designs—enough to please all tastes, whether traditional or contemporary.

Trim Pieces *when ordering please include color number*
